SUMMARY

As a Mobile Application Developer, I have five Year experience in developing Mobile applications. I have worked closely with App Design concepts, wireframe, prototypes and development process.

My experience in working on multiple platform makes good understanding of framework conventions, best practices in Object-Oriented Programming, memory management, and development tools. I am passionate about quality and optimization when it comes to code and application architecture. I am strong self-learner with a desire to stay highly informed on best practices and latest updates regarding Mobile Application Development.

I have worked extensively in the following areas of the Application Development:

- Objective-C, Swift, Cocoa Touch Framework
- Core Android Studio, Androidx
- Web Services Integration (JSON / XML)
- Google Map
- **Agile Development** (Trello & Assembla)
- Push Notification Service with Standalone and with firebase also
- **Design patterns** (MVC, Factory, Proxy, Strategy, Dependency Injection, Inversion of Control, Observer, MVVM)
- **Third party** (Promise Kit, Alamo fire, Fabric , Retrofit , Google Material design and **Firestore**)
- Social media integration (Facebook, twitter etc.)
- Beacon, Firebase chat Module Real time
- SQLite database and Core data
- Apple iTunes App Store Application Submission Process and Android Submission process
- **C , C++ , Objective-C , Swift & Androidx**
- **Payment Method** (PayPal, Etisalat, Pay fort)
- PHP / MySql (3 month experience)
- Phone Gap Experience (6-month experience)
- Xamarin Cross Platform Native Experience (2 month experience)
- HTML / CSS / JavaScript (6 month experience)

APP PORTFOLIO
